OBJECTIVE

Detail-oriented CSE undergraduate and Microsoft Certified Azure Database Administrator Associate with hands-on experience in AWS multi-region infrastructure, CloudWatch telemetry tracking, and automation scripting. Seeking the Cloud Operations Intern role at iamneo to actively contribute to multi-cloud observability, Linux system maintenance, incident response, and reliable, scalable cloud operations.

EDUCATION

Amity University Jharkhand — B.Tech in Computer Science & Engineering **2024 – 2028**
CGPA: **8.00 / 10.0** | Class XII: **88.2%** (CBSE) | Class X: **85.0%** | Sri Gurunanak Public School, Ramgarh Ranchi, India

TECHNICAL SKILLS

Cloud & Infrastructure:	Amazon Web Services (AWS — EC2, CloudWatch, S3, IAM), Microsoft Azure, Multi-Region Deployment
Observability & Telemetry:	AWS CloudWatch Metrics & Alarms, Real-Time Telemetry Ingestion, Resource Health & Latency Monitoring
Scripting & OS:	Python (Automation scripts), Bash / Shell Scripting, Linux/Unix CLI & System Administration
DevOps & Tooling:	Git, GitHub, CI/CD Fundamentals, Docker Basics, PM2 Process Supervision, REST APIs, Postman
Databases & Security:	Azure SQL, MySQL, MongoDB, Relational Schema Design, IAM Access Policies, Data Security
Core Languages & CS:	Java, Python, C/C++, JavaScript, SQL, Object-Oriented Programming (OOP), OS, Computer Networks, DSA

EXPERIENCE

Summer Research Intern — Cloud Infrastructure & Distributed Systems **Jun 2026 – Jul 2026**
National Institute of Advanced Manufacturing Technology (NIAMT), Ranchi — Mentored by Dr. Rahul Mishra *Ranchi, India*

- **Multi-Region Cloud Deployment:** Engineered and monitored DVQ, a distributed cloud infrastructure testbed spanning 7 AWS geographic regions, managing workload placement to balance latency SLAs and grid carbon intensity.
- **Telemetry Ingestion & Observability:** Configured AWS CloudWatch pipelines to ingest real-time operational telemetry, RTT latencies, and compute health, establishing alerting thresholds to sustain a 0.0% SLA violation rate across all trials.
- **Incident Response & Fault Injection:** Conducted chaos and fault-injection experiments simulating sudden traffic surges and regional grid outages; verified automated failover mechanisms and documented operational runbooks and SOPs.
- **Resource & Cost Optimization:** Analyzed cloud resource utilization telemetry to optimize multi-region traffic placement, demonstrating carbon footprint reductions of up to 35.87% (Interactive) and 30.28% (Realtime) compared to baseline.

PROJECTS

DVQ — Carbon-Aware Edge Routing & Multi-Region Cloud Monitoring **2026**
AWS (EC2, CloudWatch, 7 Regions) • Node.js • Express.js • Python • PM2 • Linux • REST APIs

- **Microservice Architecture:** Architected a decoupled 6-microservice backend (routing, telemetry, state, RTT, carbon, and AWS-metrics services) processing continuous telemetry data from AWS CloudWatch and Electricity Maps APIs.
- **Performance & Reliability:** Deployed services under PM2 process supervision on Linux instances, achieving a median gateway decision latency of 61 µs with zero queuing bottlenecks under continuous high-throughput load.
- **Documentation & Runbooks:** Produced structured technical documentation, system architecture diagrams, and operational runbooks for monitoring, deployment, and service failover.

Sangathan — Scalable Sports Management Backend & Mobile Platform **2025 – 2026**
Node.js • Express.js • MongoDB • Android (Java) • JWT Authentication • Retrofit2 • REST APIs

- **Secure Backend Infrastructure:** Developed RESTful APIs with stateless JWT authentication, password hashing, and role-based access control (RBAC) handling registrations and schedules for 100+ active users.
- **High-Availability APIs:** Modeled optimized MongoDB schemas with indexed queries achieving sub-150ms response times; integrated automated Nodemailer notifications for event updates and schedule changes.

CERTIFICATIONS & ACHIEVEMENTS

- **Microsoft Certified: Azure Database Administrator Associate:** Verified credential (Credential ID: 647C0C2C5B35FA32) validating skills in cloud database management, security, and performance tuning.
- **Microsoft Certified:** Implement SQL Solutions by Using AI-Assisted Tools (Azure / AI-assisted tooling).
- **NPTEL (IIT Madras):** The Joy of Computing Using Python — Scored **87%** (Elite Top Performer).
- **Open-Source & Problem Solving: 1,200+ GitHub contributions** over the past year; **160+ Data Structures & Algorithms** problems solved.
